Office Action Summary	Application No. 10/520,513	Applicant(s) MORETTI ET AL.	
	Examiner /Ted Kavanaugh/	Art Unit 3728	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Election/Restrictions

1. The election requirement has been withdrawn inasmuch as all of the claims read on the elected embodiment.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 8-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over US 5983524 (Polegato) in view of the prior art admitted on page 5, line 16 to page 6, line 2.

Polegato teaches a waterproof and breathable sole (see figure 12) including a tread member (702 and a midsole component comprising a lower protective layer (716), a membrane (715) and a preassemble insert that comprises a perimetric element (704) wherein the membrane and the protective layer are joined by spot gluing; see col. 3, lines 11-15. Polegato lacks the spot gluing being a thermoreactive adhesive such as thermoplastic polyurethane adhesive. Applicant teaches in the specification (see page 5, line 16, to page 6, line 2) that a thermoreactive adhesive such as thermoplastic polyurethane adhesive is known. Such an adhesive is used to provide a stronger bond between layers; see page 5, lines 24-26. Therefore, it would have been obvious for the adhesive (glue) of Polegato to be a thermoreactive adhesive such as thermoplastic polyurethane adhesive to provide a stronger bond between the layers. Figure 12 was

sighted above but all of the other embodiments also have a tread and a midsole component has a membrane and lower protective layer.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

5. Applicant is duly reminded that a complete response must satisfy the requirements of 37 C.F. R. 1:111, including:

-“The reply must present arguments pointing out the *specific* distinctions believed to render the claims, including any newly presented claims, patentable over any applied references.”

--“A general allegation that the claims define a patentable invention without specifically pointing out how the language of the claims patentably distinguishes them from the references does not comply with the requirements of this section.”

-Moreover, “The prompt development of a clear issue requires that the replies of the applicant meet the objections to and rejections of the claims. Applicant should also specifically point out the support for any amendments made to the disclosure. See MPEP 2163.06” MPEP 714.02. The “disclosure” includes the claims, the specification and the drawings.

6. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.
